5. Remarks. The mosquitto nuisance was very much felt within this Panchayat area before the implementation of antimosquitto measires. Since the implementation of antimosquitto measures from 1.12.53 every mosquitto breeding place was tackled, and much of the katcha stagnations were eliminated by propder drainage. Only unavoidable stagnations, wells, cess-pools and cisterns are sprayed once a week with 1% gamexane P.520 (wettable). Pestia and other vegetation growths from irrigation tanks were being systematically removed. The public are very much appriciating the marvaleous effects of the antimosquito measures under taken by the Panchayat and the thereby the mosquito nuisance has been almost reduced to nil. This could be very well made out from the enclosed true extracts of the appreciative remarks recorded by the General Public in a book circulated for eliciting opinion on the measures taken by th Panchayat
